

HPS HIGH PERFORMANCE SURFACE

WICANDERS
CORK FLOORING SINCE 1868

HPS THE HARD WORK IS DONE

Wicanders new products live up to the highest expectations. Our research and cutting-edge technology enable us to overcome all obstacles and create pioneering solutions that make all the difference when it comes to choosing the right flooring.

HPS, Wicanders' latest creation, has been specially designed for areas with busy foot traffic, such as hypermarkets, offices, cultural centres and leisure areas, all of which are designed for the general public.

This is high-performance flooring that adapts to Wicanders products in wood or cork. It is extremely resistant and durable and ensures that any surface is always at its best.

HPS - High Performance Surface is based on nano beads technology, where extremely tiny beads are embedded in the top layer. When compared with the standard finish this gives the whole HPS surface improved properties such as scratch, slip, scuff and stain resistance.
