CHOOSING YOUR FLOOR

WicCork

A palette of ideas inspired by nature, combining textures and surprising colors. The originality of each pattern gives any surface a personal and distinctive touch.

Whether you choose a floating floor or a glue-down, we can help determine which Wicanders floor is most suitable for your project.

Xtreme WRT:

Ceramic is, after natural diamonds, the hardest known substance in the world. Our flooring coated with Xtreme WRT finish with ceramic micro-bead technology, is a perfect choice if you are looking for a matte, unique and durable finish with low maintenance.

We want you to feel assured that you are making a good, long-term investment when you choose Xtreme WRT flooring from Wicanders. Even with its hard and resistant features, Xtreme WRT gives the floor soft and natural qualities and not the usual slippery and cold aspect provided by ordinary finishes.

HPS - High Performance Surface:

The high traffic on commercial floors puts much demand on the floor and the finish.

Wicanders commercial quality floors are produced with hard wearing surface lying between the veneer and the HPS topcoat, which makes it extremely wear resistant.

HPS finish is based on nano beads technology.

Extremely tiny beads are embedded in the top layer giving the whole surface improved properties such as scratch, slip, scuff and stain resistance, without compromising the natural appearance, elasticity and beauty of our cork floor. If you are in search of flooring for high traffic areas with an extremely durable, low-sheen finish, Wicanders Cork Flooring with HPS is the choice for you. With a 15-year commercial warranty, we are confident you will love the look and feel of Wicanders cork floors.

Glue-down versus Floating:

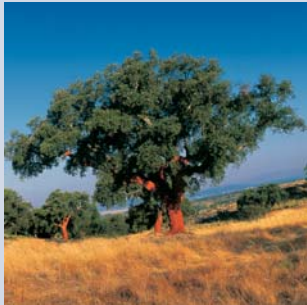

Floating:

Wicanders Cork Oak floating floor planks are engineered with the patented CorkLoc® system on all four sides. Each edge is comprised of durable compressed cork fiberboard and Cork Protect®, a natural paraffin-based all-around edge sealing system. This tightly pressed seal seamlessly vacuum locks against any and all moisture and debris, setting Wicanders CorkLoc® system apart from other floating floors

Glue-down:

If your project calls for glue down tiles because of the area of application or the size of the job, Wicanders Series 200 and Series 2000 are the ideal products for you.

WHY CORK

ENVIRONMENTALLY FRIENDLY

Cork keeps trees alive! WICANDERS floors are made with natural products and in the case of cork, an outstandingly ecological material, thus providing an environmentally friendly flooring solution. Mindful of today's need for conservation, WICANDERS floors are a true environmental alternative.

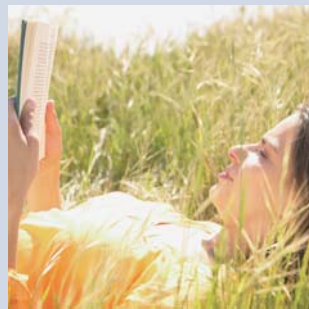

FAST & EASY INSTALLATION

Whether you choose the floating or glue-down option, WICANDERS floors are quicker and easier to install than ever before. With the improved CORKLOC-design and increased sizes of the glue-down range, a WICANDERS floor saves time and reduces installation expense.

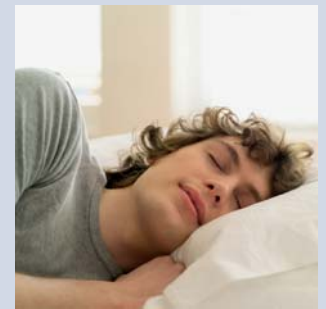

SILENCE

The cork inner structure in all WICANDERS floors is guaranteed to cut noise. The cork reduces sound transmission between and within rooms, creating a quieter, and therefore peaceful, environment in your home.

COMFORT

The unique characteristics of cork also ensure that a WICANDERS floor is more comfortable to walk and stand on. Cork's shock-absorbing properties relieve strain on your feet, joints, legs and back.

WARMTH

The unique qualities of cork offer benefits other floors can't match. The natural thermal insulation properties make WICANDERS floors very pleasant to the touch, even with bare feet as they provide an optimal floor temperature all year round.

HEALTH

WICANDERS floors come with surface finishes that put a stop to entrapped dirt, germs or fungus, thus actively contributing to a healthy and hygienic environment.

EASY MAINTENANCE

The specialised surface finishes of WICANDERS floors make them easier for you to clean and maintain. A vacuum cleaner and a mop are all that is required to keep WICANDERS floors looking as good as new.

DURABILITY

With their unique cork structure and tough resilient surface finishes, WICANDERS floors are as durable as you'll ever need them to be. A WICANDERS floor withstands years of wear and still looks as good as the day it was first laid.

WICANDERS®

Improving quality of life, creating
a positive impact on the environment

Yours Purely,

experience . experience

A perfect combination between
nature and technology

- > Advanced Binding Technology by BASF
- > Water Based all Acrylic
- > Formaldehyde free

- > Energy Saving
- > Excellent Natural Comfort

WICANDERS flooring now with Acrodur®

SERIES 200

Series 200 WRT *Natural*

Xtreme WRT, which is based on a ceramic compound, is available as a glue-down floor. Microscopic analysis reveals the microstructure of tiny ceramic micro beads, which protect the floor for a long period of time against abrasion and scratches.

FEATURES:

Xtreme WRT Finish:

A 4 mm solid cork tile that insulates, absorbs sound, feels warm to the touch, and is extraordinarily soft to relieve strain on feet, joints, legs and back

Installation system:

Glue down

Dimensions:

nominal: 24 x 12 x 5/32"
(600 x 300 x 4mm)

Warranty:

5 Year Light Commercial

Suitable for:

Courthouses, Churches, Classrooms, Dormitories, Conference rooms

Approximate installed cost:

\$5.00 - \$8.00 per square foot

LEED qualifying points:

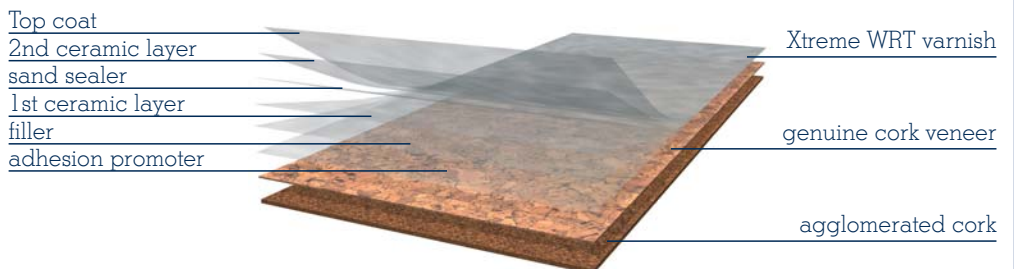

MR Credit 4.1 & 4.2 (100% recycled content)

MR Credit 6

IEQ Credit 4.1

ID Credit 1

Note: Series 200 WRT comes with a factory applied finish and does not need to be finished on site.

Cork flooring LEED credits

Recycled Content:

MR Credit 4.1:
10% (post-consumer + ½ pre-consumer)
MR Credit 4.2:
20% (post-consumer + ½ pre-consumer)
Wicanders Cork Flooring is made from the waste of the cork wine stopper industry, hence containing post-industrial/pre-consumer waste. The percentage of recycled content depends on the product line. Series 200 contains 100%, Series 1000 contains 45.8% and Series 2000 contains 76.5% recycled content.

MR Credit 6:

Rapidly Renewable Materials
Wicanders Cork Flooring is made of the bark from the cork oak tree. The bark is harvested every 9 years and the bark regrows. The tree is never harmed or felled.

IEQ Credit 4.1:

Low-Emitting Materials:
Adhesives and Sealants
The adhesives used in our glue-down products have low VOCs and are compliant to the EC1 European standard
In addition, Wicanders Cork Flooring is being produced with the new Acrodur® binder from BASF, which makes the cork in all of our products 100% formaldehyde free.

ID Credit 1-1.4:

Innovation in Design
The natural properties of cork - thermal insulation, resilience, comfort, molecular structure, sound absorbance - make this choice of flooring innovative in design.

WARRANTY

EXTENDED STRUCTURAL AND WEAR WARRANTY

We warrant, that our flooring products, when supplied as new and through approved outlets, shall be free of defects in lamination, assembly, milling, dimension and grading, and that the Surface Wear Layer will not wear through within the periods, after invoice date, indicated in the table above. The term "wear through" is defined as the 100% reduction of the Surface Wear Layer over an area comprising 5% of the total Surface Flooring installed.

IMPORTANT: The Wicanders Warranty is valid if the Wicanders Installation and Maintenance instructions that are in the flooring packaging, in the auxiliary products (adhesives, maintenance & cleaning products, etc.) packaging and in the website www.wicanders.com are respected. In case of any doubts contact us at: marketing.ar@amorim.com

EXTENDED WARRANTY COVERAGE

If in the unlikely event our products do not perform according to the applicable warranty, we will, at our option, repair, refinish or replace such portion, with the same product or another product of equal value (at our selection), or refund the price paid - if replacement or repair cannot be made in a timely manner.

A) During the first three (3) years of this warranty we assume liability of removal of defective products and installation of replacement products, **AT NO COST TO YOU**. After this period (when applicable), we shall only provide the flooring products for replacement, according to the lifetime usage table below.

B) The value of each m² of replacing flooring is:
Period (years): Coverage:

3-10	100%
11-20	50%
21-25	25%

MAINTENANCE

REGULAR MAINTENANCE

HIGH PERFORMANCE SURFACE (Series 1000, 2000) and WRT (Series 100, 200)

- Vacuum or sweep the floor to remove any loose grit and debris, using a soft, clean brush.
- Mop your floors with a high quality sponge mop, keeping the mop moist rather than wet. Use only clean water, nothing else is needed. Periodically, use Wicanders Soft Cleaner or Xtreme Natural Cleaner (for Xtreme WRT floors) following instructions on the label. Wring out the sponge mop vigorously. Mop in the direction of the grain. If you see water on your floor, your sponge is probably too wet.
- Allow the floor to dry completely
- Do not use any oils or waxes on dust mop
- Use a sponge mop dampened slightly with water or Wicanders recommended cleaner (Wicanders Soft Cleaner or Xtreme Natural Cleaner - for Xtreme WRT floors), on a regular basis, to remove any kind of soil and grit. The frequency of cleaning depends on the amount of traffic (daily - weekly)
- Never use anything other than water or Wicanders recommend cleaner on your Wicanders floor coated with Xtreme WRT or HPS finish.
- You may want to press the mop into a dry towel to remove excess moisture. For heavily soiled floors, use Wicanders recommended cleaners only. (Wicanders Soft Cleaner or Xtreme Natural Cleaner - for Xtreme WRT floors).

TIPS TO KEEPING YOUR FLOOR LOOKING GREAT

- Use doormats at all entrances to remove dirt and grit carried on footwear
- Clean up spills and spots immediately
- Use felt pads on chair and furniture legs and replace them as they wear out
- Furniture castors should have a width proportional to the supported weight
- Use protective office mats under rolling chairs
- If works will take place in the room where the floor is installed, protect with craft paper, plywood or hardboard
- Cork, as a natural material may tend to fade when exposed to sunlight. Use blinds, curtains or other sun screening system to minimize this effect
- Avoid excessive moisture on the floor.
- Ideal and healthy room conditions are 35 - 65% relative humidity at 68°F (20°C).

ON ALL SURFACES, NEVER:

- Use latex or rubber backed mats as they can permanently stain the floor.
- Use cleaning products with abrasive ingredients or solvent-based ingredients, e.g. acetone
- Use wire brushes
- Drag furniture across the floor
- Use a wet mop or pour water directly on the floor
- Use wax, polish, or abrasive cleaners, steel wool or scouring powder
